

Established in 2018, the National Offshore Wind Research and Development Consortium (NOWRDC) is a nationally-focused, not-for-profit, public-private partnership dedicated to managing industry-focused research and innovation to reduce the levelized cost of energy (LCOE) of offshore wind in the U.S. while maximizing other economic and social benefits.

NOWRDC advances the U.S. offshore wind industry through:

High-Impact Research & Development

Building strong networks connecting technology innovators, investors, and industry

- I Supply Chain and Logistics
 - II Electrical Power Systems

NOWRDC has awarded

\$31 million to 46 different projects in the following 7 technical categories

- III Operations and Maintenance and Safety
- IV Environmental and Conflicting Use
- Wind Resource and Site Characterization
- VI Floating Structure Engineering
- VII Fixed Structure Engineering

In Nevada

NOWRDC provides over \$799k in total funding to a project conducting offshore wind research and development in the State of Nevada.
